

WHITE-BOARD EXERCISE #6 OCTOBER 17, 2005

What does this cartoon tell as about this plant's pollination? [Daisy](#)

1. Is this plant a monocot or a dicot?
2. Infer what type of cues it presents to attract pollinators.
3. Based on this information (above), describe its pollination syndrome.
4. Explain why/why not this pollination syndrome is likely achieve reproduction for this plant?
5. What could the plant offer that would increase pollinator visits and promote its reproduction?
