

You're preparing notes to teach Cellular Respiration time. It's been a few years since you first learned this, so you need to teach yourself before you face your students.

Use the following table as an organizing tool for your preparation.

Chemical Process	Where it happens in the cell/organelle	Begins with _____ chemical & Ends with _____ chemical	# & type Input chemical energy carrier molecules	# & type Output chemical energy molecules
Glycolysis				
Anaerobic Respiration				
Aerobic Respiration
