SCHOLARSHIPS AND STIPENDS FOR NEW MATH AND SCIENCE TEACHERS

Your background in mathematics & science (or STEM: Science, Technology, Engineering and Math) makes you an ideal candidate for switching into a career in math or science teaching. The two areas of greatest shortage in New York State teacher supply are mathematics and science.

TEACHER CERTIFICATION

New York State certification requirements may be met through traditional or alternative certification programs at Buffalo State College. Additional information may be found at:

<http://physicsed.buffalostate.edu/noyce>

<http://www.buffalostate.edu/teachercertification/>

Touch the future – teach!

NOYCE FUNDING

Noyce scholarships support STEM major students transferring into Bachelors degree science or math teacher preparation programs as either a Junior or Senior. *Noyce scholarship* recipients may receive a maximum of \$8500 per year for up to two years.

Applicants who already hold a STEM Bachelors degree and who enter either a post-baccalaureate or Masters Degree teacher certification program may be eligible for a one year maximum *Noyce stipend* of \$10,000.

Noyce scholarships and stipends are intended to recruit new science and mathematics teachers by defraying real study costs (tuition, room, board etc.) for individuals transitioning to a STEM teaching career. Noyce scholarship and stipend recipients are expected to teach two years in high needs districts for every year of scholarship or stipend support received. Participants must complete their certification program within two years; and they must meet their teaching commitment within six years of completion of the program. Participants who fail to meet the teaching requirement will be expected to repay the NSF the amount of their Noyce support plus 5% (fixed annual interest).

While the shortage of NYS STEM teachers is great, the shortage of STEM teachers is particularly acute for minority teachers, and minority candidates are particularly encouraged to apply for Noyce support.

PARTNERSHIP INFORMATION

Additional information can be obtained by contacting the following individuals:

Principal Investigator:
